All in 1SOL
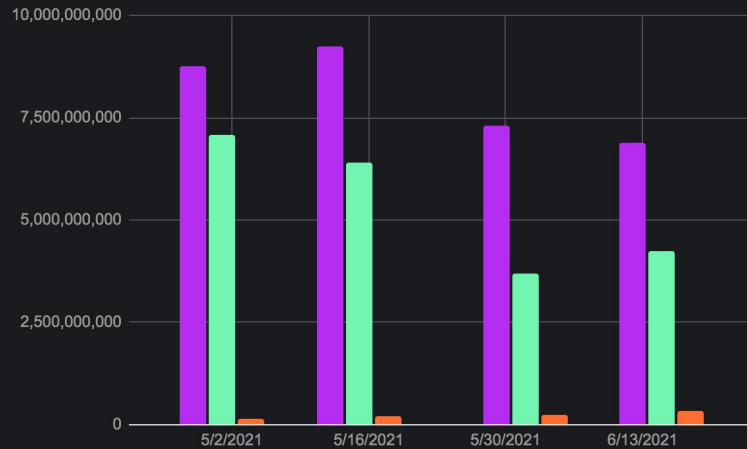

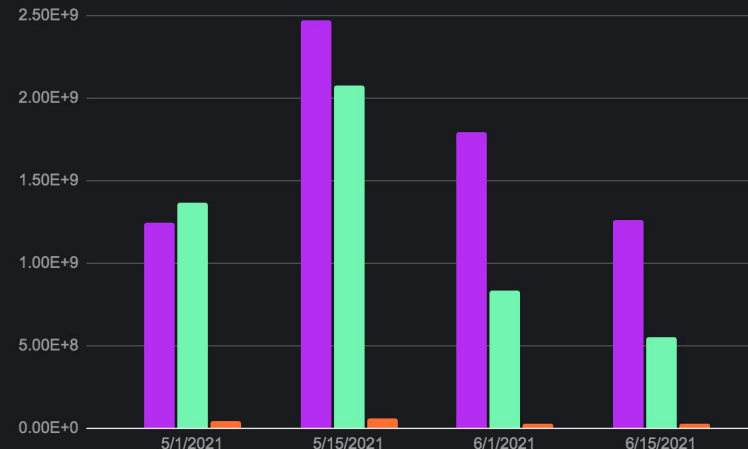

**A Cross-chain DEX Aggregator on Solana**

Great Potential on Solana for DeFi

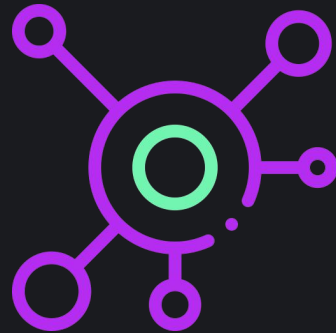

Trading Volume

Total Value Locked

Transaction Per Day

Solana vs. Ethereum & BSC in DeFi

1Sol.io

# Demand in Aggregation on Solana

DeFi Infrastructures in Rapid Growth

Aggregators in High Demand

Cross-Chain Transactions on Solana Being the Future

1Sol.io

1SOL is born for Solana

Aggregate swaps

**Integrate order book**

Expand to OTC market

- Go-To Trading Portal: Be the go-to trading portal for trading on Solana.
- One-Stop Aggregation Service: Integrate all kinds of DeFi and DEX.
- Fool-Proof Operation: Provides the average user with information on prices, slippage and costs of all DEX on the web. Users can choose for themselves the one path that best suits them to trade.

- x1Sol → x% ⋯⋯ BTC

User — 1Sol Token / ? BTC →

1Sol.io

1SOL Working Process

When User want to swap Token A to Token B ...

1SOL Provides A Better Choice

Why multiple swap is better than single swap?
When Token A is to Token B ......

1SOL Offers the Best Deal
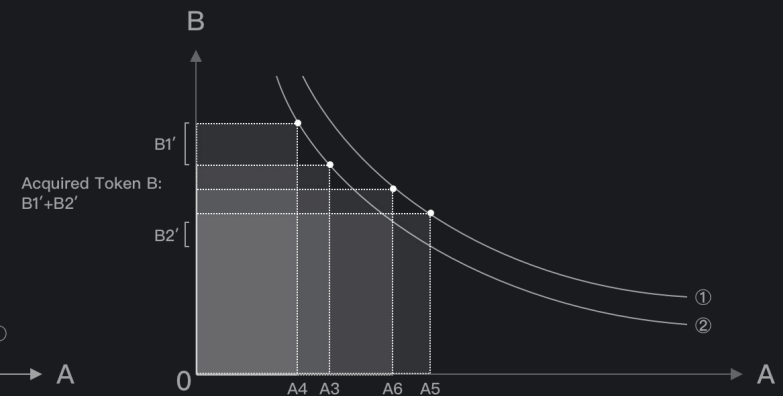

Pool A–B

Single Swap
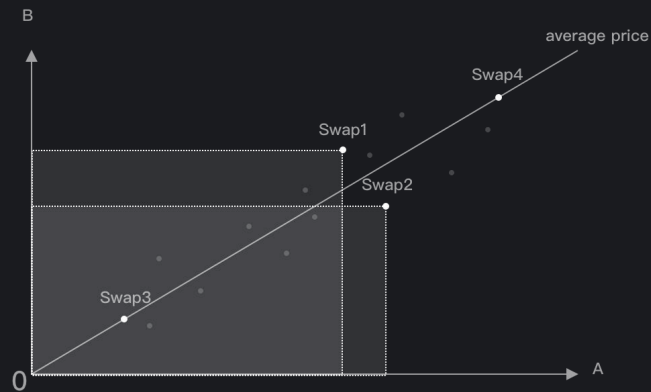

Multiple Swap

– The ratio of A token and B token is different in Swap1 and Swap2
– Swap has a different handing fee
– Swap TVL is different,and has different slippage(Swap3 and Swap4)

$$(A5-A6)+(A3-A4)=A1-A2$$
It is possible that
$$B1'+B2' > B1$$

1Sol.io

Example

Single Swap

Trader
100 Token A

Pool 1
100 Token A
100 Token B

SWAP
Input: 100 Token A
Output: 50 Token B

50 Token B

Multiple Swap

Trader
100 Token A

Pool 1
100 Token A
100 Token B

SWAP
Input: 50 Token A
Output: 33.33 Token B

Pool 2
100 Token A
100 Token B

SWAP
Input: 50 Token A
Output: 33.33 Token B

66.66 Token B

$ 1Sol.io

Cross-chain Aggregation

PolkaBTC

WBTC

HBTC

renBTC
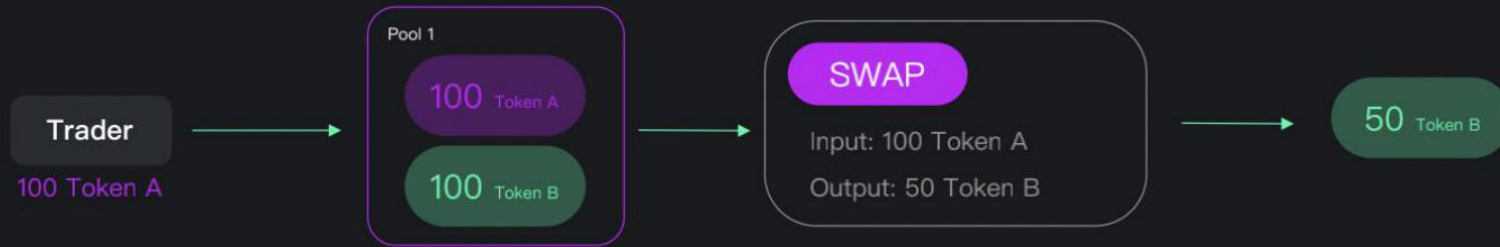

Mainstream cryptocurrencies will have their own mapped assets on each chain. For example, for BTC, there are WBTC, HBTC.

1Sol.io

1SOL Tokenomics

Governance

Vote for new connected swaps and markets.

Cross-Chain Discount

Help users to decrease crosschain loss via 1Sol crosschain token bank.

Fee Deduction

Use 1SOL in the transactions to reduce the split percentage

Farming

Users can profit from 1Sol token liquidity pools and yield farming features.
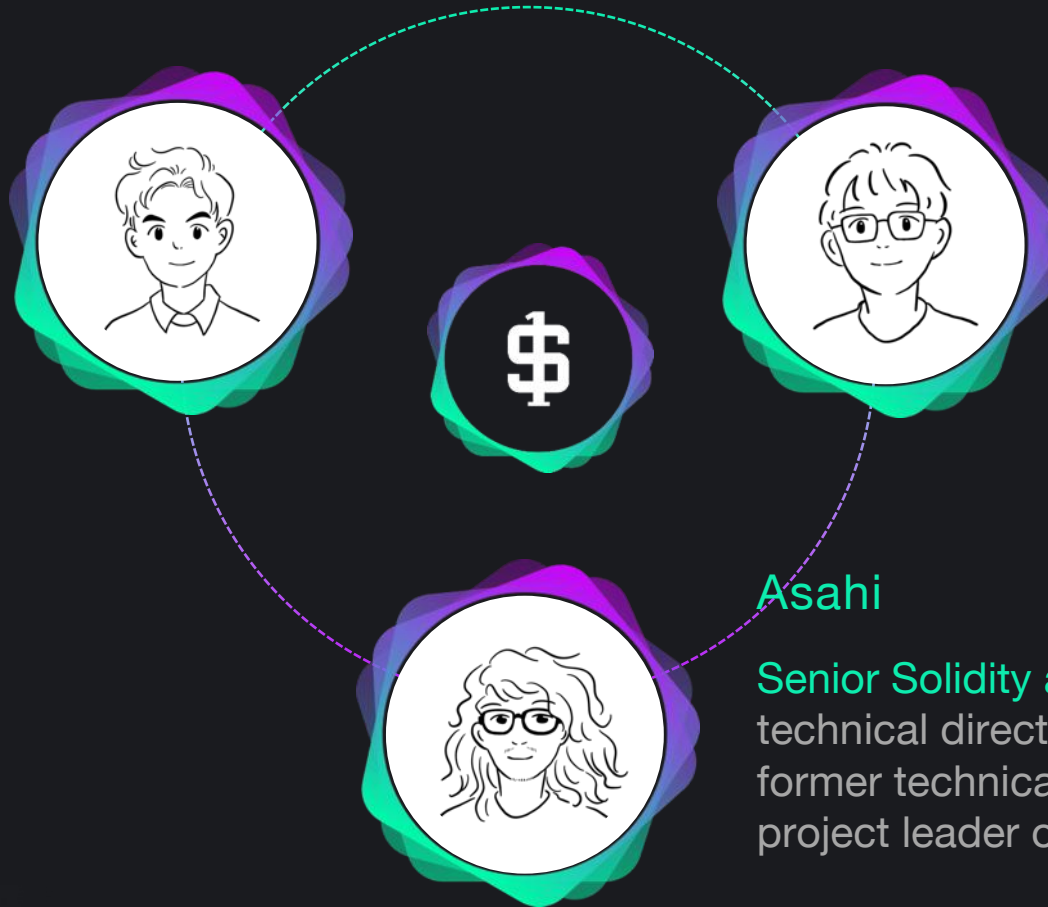

1Sol.io

1SOL Team

TinTin

1Sol's Project Manager, DeFi ecosystem researcher and observer, has 7 years of trading experience, also an experienced and energetic entrepreneur who has founded several top 10 marketing companies.

Croath

1Sol's Technical Director, full-stack blockchain developer for over 7 years. Ethereum contributor, EOS community contributor. Read Eval tech writer and translator.

Asahi

Senior Solidity and Rust developer, former technical director of a Japanese art coin, former technical director of a crypto wallet, project leader of an algorithmic stablecoin.

Roadmap

2021 Q3

Launch the official website

Airdrop 1Sol token for early users and build 1sol community

DEX aggregator MVP on testnet

2021 Q4

Deploy the basic version of 1Sol aggregator on mainnet.

Get 1Sol associated with at least three popular swaps.

Provide pool mining feature on Solana.

Deploy the test version of cross-chain aggregators on ETH, Polkadot, etc.

2022 Q1

Link with all possible, trustworthy swaps on Solana.

Upgrade to the enhanced V.2 aggregating algorithm.

Extend to multi-swaps, get prepared for cross-chain liquidity.

Get at least one cross-chain bridge ready for 1Sol aggregator.
